SUMMARY

Aspiring Full-Stack Developer with strong proficiency in JavaScript, React, and modern web development frameworks. Experienced in building responsive and scalable web applications through hands-on projects. Motivated to expand expertise in both front-end and back-end development, applying best practices to real-world applications. Continuously enhancing technical skills and seeking opportunities such as internships, junior roles, or freelance projects to gain practical experience.

EDUCATION

Alexandria University

Student at Faculty of Computer and Data Science

OCT 2023 -Expected graduation JUN 2027

EXPERIENCE

Digital Egypt Pioneers Initiative - DEPI

Nov 2025 – Jul 2026

- Gaining hands-on experience in full-stack web development through structured projects using React for front-end and NodeJS for back-end.
- Built responsive web applications to practice fundamentals such as component architecture, state management, routing, and UI/UX best practices.
- Applied Git and GitHub for version control and followed clean coding and modular design principles in real-world projects.
- Practiced server-side scripting, API integration, and database connectivity while building reusable and scalable components.
- Continuously improving problem-solving and debugging skills to refine application logic and ensure robust, production-ready web applications.

PROJECTS

Library Management System | React.js - Tailwind CSS - Shadcn/UI - - Recharts - Redux - ReactQuery - Zod

- Developed a full-featured **Library Management System** to manage books and users efficiently with a responsive, user-friendly interface and reusable components.
- Implemented a secure **login page with form validation** to authenticate users and ensure proper input handling.
- Managed application state using **React hooks** and enabled real-time updates for borrowing and returning books.
- Designed the system with a focus on **scalability, maintainability, and clean UI practices**.

Admin Dashboard | React.js - Material UI - Nivo Charts - FullCalendar - Formik

- Developed a responsive **admin dashboard** using React.js with a modular component-based architecture.
- Implemented interactive **data visualizations** and analytics using Nivo Charts.
- Integrated **calendar scheduling** features using FullCalendar for event management.
- Built validated forms using **Formik** and **Yup** to ensure reliable user input handling.

Plant Paradise Landing Page | React.JS - Tailwind CSS - Framer

- Created a modern **landing page**, focusing on responsive design and usability.
- Implemented clean, visually appealing layouts with reusable components.
- Applied best practices for **front-end development** and performance optimization.
- Showcased practical skills in React and CSS for real-world web applications.

Ecommerce Clothes Shop | ReactJS - Tailwind CSS - Material UI - Framer

- Developed a full-featured **E-commerce Clothes Shop** using React and CSS for front-end and NodeJS for back-end.
- Implemented **product listing, search, and filtering** features for smooth shopping experience.
- Added **shopping cart and checkout functionality** with state management using React hooks.
- Applied responsive design principles and reusable components to create a user-friendly and visually appealing interface.

CERTIFICATES

hyperref Certificate	Issuer	Year
Full-Stack Web Development	Digital Egypt Pioneers Initiative (DEPI)	2026
JavaScript Programming Essentials	Coursera IBM	2025
Developing Front-End Apps with React	Coursera IBM	2025
Getting Started with Git and GitHub	Coursera IBM	2025

TECHNICAL SKILLS

- **Programming Languages:** HTML- CSS - Javascript - C++ - TypeScript - SQL - Python
- **Frameworks & Tools:** ReactJS - Git - NodeJs

LANGUAGES

- **Arabic** – Native
- **English** – C1(Advanced)
